EDUCATION

The University of Oklahoma – Price College of Business Norman, OK
Accelerated M.S. Management Information Technology - 4.0 GPA *Expected Dec 2026*

The University of Oklahoma – Price College of Business Norman, OK
B.B.A. Management Information Systems - 4.0 GPA *Obtained Dec 2025*

WORK EXPERIENCE

Volvo Group Greensboro, NC
BI & Analytics Intern - Digital Technology & Operations *May 2026 – Oct 2026*

- Designed a multi-page Power BI dashboard from scratch, giving Volvo real-time visibility into 5.69M+ cross-references across 291 suppliers and 402 supplier programs
- Integrated live API data with a 20+ table Azure database, turning it into clear visuals that highlight data quality gaps and trends for stakeholders
- Built a code quality tracking and alerting system from scratch using SharePoint and Power Automate
- Engineered six automated workflows to proactively flag unit coverage declines and overdue action plans
- Developed dynamic HTML email alerts with month-over-month metrics to streamline organizational communication

Devon Energy Oklahoma City, OK
Tax Technologist Intern - Data Analytics *May 2025 – Aug 2025*

- Built and maintained Power BI dashboards to translate complex tax data for stakeholder and executive decision-making
- Performed daily database integrity checks within SSMS and updated scripts to resolve system issues
- Contributed to the development of AI agents to automate PDF data extraction for database entry
- Maintained and optimized Python scripts to streamline tax data extraction and analysis
- Created process documentation & workflow maps using Visio and Lucidchart to support operational transparency

PROJECTS

OU MIS Case Competition Spring 2025 - First Place Team Overall *(Out of 200+ Students)*

- Partnered with The Chickasaw Nation to simulate a real-world consulting project
- Analyzed a multi-million record dataset to develop tangible solutions that would streamline operations and leverage technology for profit
- Uncovered meaningful insights through various analytical tools and techniques such as Python, Streamlit, and Power BI, leading to our team's final recommendations

chat.bnb – Airbnb NLP Chatbot *Analytics Programming Python Project*

- Developed a desktop chatbot application in Python using NLTK, pandas, and ttkbootstrap to query 100,000+ NYC Airbnb listings through natural language
- Built and styled the GUI to match Airbnb's branding, connecting user input to the NLP backend
- Collaborated with a team of 5 to deliver insights on pricing, availability, and data quality across all NYC boroughs

Western Logistics Network Design *Infrastructure and Security Project*

- Designed an enterprise network spanning two buildings with VLANs, Wi-Fi 6, and Cisco security hardware
- Proposed two network builds at $36,521 and $51,204, each designed to support 20–30% growth
